

HELLO EVERYONE!!!

Firstly let me apologise for now doing a report now for quite awhile, we are extremely busy at the hospital this year. This is one of busiest years for at least 4 years, but we absolutely love it.

Although I haven't done a report for a few months or years I just wanted to use this report to put out a few requests. We are always asking for donations from the members of public and we are always asking people to send things into us such as, dish cloths, sponges, scrubbers, washing liquid, bleach, disinfectant, toilet roll, kitchen roll, newspapers, old sweeping brushes you no longer use, old mops you no longer use etc.

Well what I would also like to put towards you is that we also need things for us, such as, staff volunteers and the work experience. I'm talking about things such as, coffee, tea, sugar, milk, hand wash (anti bacterial wash), hand cream (although I shouldn't name a brand something along the lines of E45 due to the fact that we are constantly washing our hands at Weirfield), marigolds ETC. These things would be truly helpful at Weirfield and we would use them very effectively as well.

Keeping along the lines of volunteers we are still taking volunteers on at the hospital, so don't despair if you have sent in an application form we will hopefully be getting hold of you soon to come and do some volunteering work, what I must put across to everyone that does want to volunteer with us is that when you do come to volunteer, that most of the jobs that you will be doing is cleaning. Please be aware of this and do not expect to be 'cuddling animals' because that is not what we are about at Weirfield. Our aim is to rehabilitate and release at Weirfield and that means that any wildlife that is released from the hospital is NOT TAMED!

Sorry this is a short report but I now hope to be on top form on producing reports for you all to read

:D
